

Unleash potential —
**Tailored upskilling for
the professional services
cyber workforce of
tomorrow**

Elevate client trust and operational excellence
through advanced cyber skills development.

Navigating the digital frontier with confidence

Professional services firms stand at the forefront of digital transformation, guiding clients through complex developments with unmatched expertise. Yet, the landscape is shifting.

As regulatory demands evolve and the talent gap expands, it's clear that a new approach is needed. Cybersecurity is no longer just a safeguard; it's a catalyst for strategic growth and innovation.

To truly thrive, professional services firms must dive deep into their core strength: **their people**. Attracting top talent is essential, but equally vital is fostering a culture of agility and foresight. This enables teams to navigate the complexities of tomorrow with confidence and innovation.

As professional services firms navigate this terrain, the critical focus shifts from adapting to evolving cybersecurity demands to leveraging it as a strategic asset to lead with confidence and trust.

The journey toward excellence is not just about acquiring new knowledge; it's about integrating continuous learning with practical application. This approach cultivates teams skilled not only in theory but also in designing and deploying industry-leading solutions for clients.

Embracing these changes redefines industry standards, leads the market, and prepares for a future where strategic foresight shapes outcomes.

Align strategies with action

By equipping your consultancy teams with advanced cybersecurity insights and tools, your consultants are empowered to proactively manage risks, optimally utilize technology, and seamlessly integrate these capabilities into client solutions.

— The following strategic fusion of technology, processes, and people is critical to achieving true cyber performance.

Empowering your clients' digital transformation journey

1

Talent development & cyber readiness

Our approach goes beyond traditional training, focusing on the dynamic needs of the cybersecurity landscape. By fostering continuous learning and a strategic talent pipeline, we prepare your team to confidently address emerging threats, enriching your workforce with fresh perspectives aligned with your business goals.

2

Client trust & resilience

Reliability is key in your client relationships. We focus on enhancing your consulting capabilities through immersive training programs. Strengthen your position as a trusted advisor and deepen client relationships, while ensuring resilience against unforeseen challenges.

3

Innovation

We commit to keeping your team at the forefront of cybersecurity innovation, enabling you to offer tailored, cutting-edge services. This proactive stance not only positions your firm as an industry leader but also protects the interests of your clients.

4

Strategic technology integration

Digital transformation is more than just new technology; it's about integrating these advancements with robust cybersecurity measures. We guide your team to master these technologies, enhancing both client service quality and business resilience.

5

Compliance & governance

In today's complex regulatory landscape, our training aligns with leading frameworks like NIST/NICE and MITRE ATT&CK, ensuring your teams are not only compliant but also adept at navigating regulatory changes, maintaining both operational agility and high service quality.

6

Global standards

We ensure consistent cybersecurity expertise across all regions, adhering to global standards and fostering a culture of excellence and resilience.

As you lead your clients through the complexities of the digital age, our **cybersecurity skills development and training platform** empowers you to build a future where digital innovation, client trust, and cybersecurity resilience go hand in hand.

Crafting future-ready teams through strategic cyber performance

In a world where cybersecurity threats evolve daily, achieving cyber excellence is a never-ending journey. It's about pushing boundaries, staying ahead of the curve, and transforming challenges into opportunities for growth.

HTB Enterprise Platform is an all-in-one platform that serves as a one-stop shop for you to recruit, upskill, retain, and track your team's success.

Academy - Learn

Lay the foundations with our interactive skill development platform—for teams to elevate career paths, get certified, and put theory into practice.

Dedicated Labs - Practice

Expose teams to the latest threats and vulnerabilities with offensive and defensive content, facilitating collaboration and real-world training.

Professional & Cloud Labs - Upskill

Challenge teams to fully-fledged scenarios simulating a real enterprise environment, preparing them to be proactive in real-life incidents.

CTF & Battlegrounds - Benchmark

Test your team's progress with CTF events that highlight strengths and weaknesses—repeat this exercise regularly for a true reflection of your team's performance.

Enhanced TTXs - Benchmark

Assess your team's response readiness with tabletop exercises that test technical and organizational responses to security incidents.

Talent Search - Recruit & Retain

Share job openings with the HTB community, and gain insights into their practical experience on the HTB Platform—test their abilities with custom-made HTB challenges.

HTB Enterprise Platform offers

Learning portal

A browser-based access point to a comprehensive suite of over 1000 cybersecurity modules.

Cybersecurity curriculum

Coverage from foundational skills to advanced tactics across red, blue, and purple team roles.

Virtual labs

Secure, simulated environments for practical application of cybersecurity concepts.

Secure virtual environment

A space just for your team to upskill, with no risk to your organization or lengthy wait times.

Custom learning paths

Configurable educational tracks to align with diverse cybersecurity role requirements.

Analytics & progress tracking

Tools for monitoring learning outcomes and team progress across NIST/NICE and MITRE ATT&CK frameworks.

Tech stack integration

With OpenAPI, our platform integrates effortlessly with your existing systems to complement your team's workflow.

Maintenance-free platform

Always on, requiring no maintenance from your organization.

Cyber performance

— A blueprint for tomorrow's workforce

At HTB, we specialize in cyber performance, going beyond training and instead transforming mindsets, creating teams who are proactive. This strategic lever boosts growth, security, and fosters unparalleled client trust.

→ **Discover training that's as unique as your team**

Unlock your team's potential with personalized, role-specific cybersecurity training. Accelerate skill application and enhance operational performance across all levels of expertise. Empower each team member to progress at their own pace, driving engagement and organizational effectiveness.

→ **Fast-track talent integration and skill mastery**

Streamline onboarding with structured learning paths that minimize ramp-up time and maximize agility. This focus on continuous development enhances your team's capability to tackle cybersecurity challenges efficiently, reinforcing your competitive edge.

→ **Foster high performing culture with strategic talent development**

Empower your team with clear advancement paths and continuous learning opportunities. By aligning employee growth with strategic business goals, you create a dynamic environment that not only motivates but also retains top talent. This ensures that your workforce is consistently engaged and evolving, guaranteeing your team's long-term success.

→ **Unlock operational efficiency and clear ROI**

Seamlessly integrate cybersecurity training into daily operations to see tangible improvements and a significant impact on your bottom line. Our approach provides clear metrics to demonstrate ROI, enhancing strategic decision-making and showcasing the effectiveness of your cybersecurity investments.

→ **Global consistency and local precision in cybersecurity training**

Maintain global standards of cybersecurity excellence while flexibly addressing local challenges. Empower your teams worldwide to receive consistently high-quality training, tailored to meet specific regional requirements and challenges, effectively managing risks across all operations.

Aligning tailored training solutions to your strategic goals will elevate your team's performance, ensuring they excel in the dynamic cybersecurity landscape.

This approach enhances service delivery, fosters client trust, and drives sustainable growth across all facets of your business.

Why partner with HTB?

✓ **A trusted industry partner**

As a trusted industry partner, we work with numerous leading professional services organizations, such as PwC worldwide. Features like flexible seat management and industry-recognized certifications highlight our platform's adaptability and commitment to advancing your team's capabilities.

✓ **Comprehensive skills development**

Tailored to every team member, our training spans all cybersecurity facets. From personalized learning paths for blue, red, and purple teams to a dynamic content library that stays ahead of industry trends, we ensure your team is equipped for the present and future.

✓ **Dynamic learning experience**

Through gamification, real-world simulated environments, and collaborative challenges, we offer an engaging learning experience that enhances skill application and knowledge retention.

✓ **Seamlessly aligned with your strategic business goals**

We understand the importance of operational efficiency and the need to demonstrate the value of your training investments. Our solutions are designed to deliver clear metrics that highlight ROI, enhancing decision-making and showcasing the direct impact of strategic talent development.

With more than 2.7 million cybersecurity professionals engaging with our platform, our dedication to quality education tailored to all learning styles is evident.
