

# We help modern CISOs achieve business objectives

How a performance-based mindset can optimize governance and risk assessment

# CISO challenges are business challenges

# It's not always about skills or certifications

The final outcome is what matters

#### Organizational security posture

## Make security people-centric

1. Setrelevant goals& objectives

for your teams

2. Add real-world rules & mechanics

**3. Pay** attention to your tooling

**4. Track** progress to make informed decisions

**5. Provide** feedback & rewards

#### Effective incident response

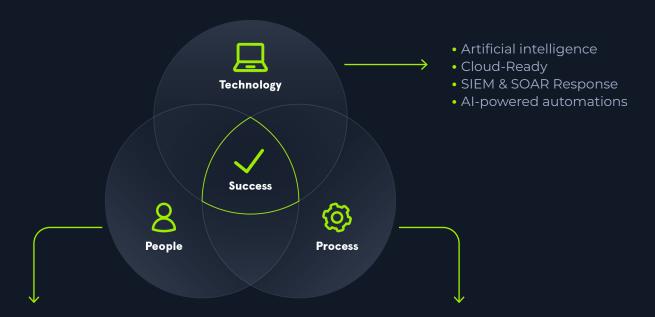

### From skills to performance

#### Incident-related costs

# People, process, technology

- Human risk management
- Performance management
- Career development
- Re-skilling
- Security culture

- Periodic cyber response exercises
- Faster, better talent sourcing
- Training & testing
- Setup governance practices

#### Budget management

# Translate cyber risk into real \$

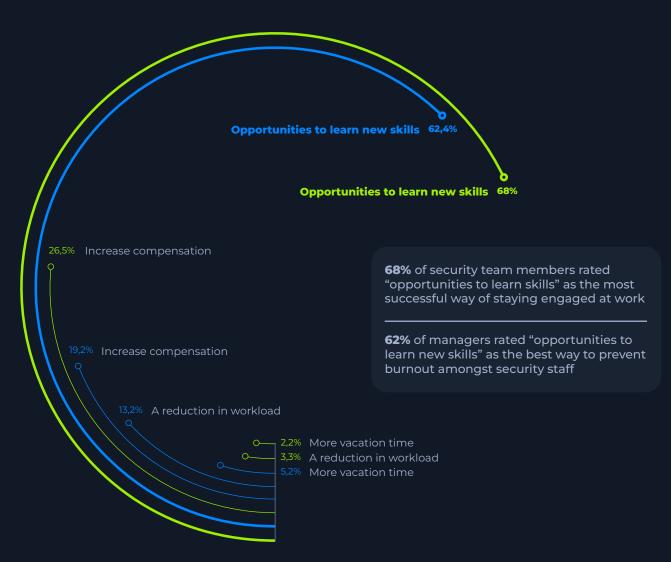

#### Talent acquisition & workforce development

# **Burnout is your first threat**

What keeps cybersecurity team members engaged at workWhat do managers consider the best way to avoid burnout amongst cybersecurity staff

#### Governance & compliance

# Make it a c-level job

Avoid personal and business liability by managing cybersecurity as C-suite effort. Translate technical findings into business insights to ensure:

# An evolving 360 journey to align business and security objectives

#### Academy - Learn

Theoretical courses combined with hands-on assessments and lab exercises that mimic real-world applications and infrastructures, divided into skills and job roles.

#### **Dedicated Labs** - Practice
