

Real-time breach and crisis simulation

Test your organizational security performance and see how your staff reacts under pressure

The challenges

Limited realism in simulations

Simulations may lack realism, making it difficult for organizations to accurately understand or assess their response capabilities.

Resource intensiveness

Companies may find it challenging to allocate time, personnel, and resources for regular and realistic simulation exercises (without ensuring the expected end result).

Communication breakdowns

It is not always easy for organizations to maintain effective communication, impacting the coordination of response efforts.

Identification of improvement areas

Without clear insights from simulations, companies will just miss opportunities to enhance their incident response performance, no matter the result of the assessment.

Expected outcomes

Time to Detect

Detect incidents faster!

Time to Respond

Know what to do,
before it happens.

Time to Mitigate

Less time, less costs.

Deliver effective gamified crisis simulations!

What if you could turn them into thrilling, edge-of-your-seat experiences that'll have your team begging for more?

1. Set

relevant goals & objectives for your teams

2. Add

real-world rules & mechanics

3. Pay

attention to your tooling

4. Track

progress to make informed decisions

5. Provide

feedback & rewards

Master adversarial strategies to enable defensive operations

Our upskilling platform has helped brands like these build safer, attack-ready organizations.

Hack The Box solution

Hacking Battlegrounds - Benchmark

Real-time cyberwar simulation works as a great assessment of current skills and methods to reinforce current security practices, communication, and team performance.

Academy for Business - Learn

Provide new employees with the skills and tools to deliver daily tasks according to their job roles and responsibilities.

Dedicated Labs - Practice

Provides new employees the skills and tools to deliver daily tasks according to their job roles and responsibilities.

Professional Labs and/or Cloud Labs - Upskill

Keep improving workforce skills with complex, advanced enterprise infrastructures inspired by the latest TTPs and technologies.

Table-top Exercises (TTXs) - Benchmark

Stress test your SOPs using technical data and focus the team's skill development based on measurable results with a custom-made report after the simulation.
